Experience

Startup Haven **17th Jan – 30th June**

Software Engineer Intern

- Software Engineer Intern at Startup Haven, developing a comparison platform for quick-commerce and e-commerce applications. Built scalable web scraping pipelines, standardized multi-source data, and designed user-friendly interfaces for comparing prices, offers, and delivery options.

Technical Skills

Frontend	HTML, CSS, JavaScript, React
Backend	Node.js, Express.js, TypeScript, FastAPI, API Integration, REST APIs
Databases	MySQL, MongoDB
Tools & Platforms	Git, GitHub, Supabase, Vercel, OAuth, Tableau, Power BI

Projects

KrishiMitra

- Designed and implemented a chatbot solution to provide farmers with real-time agricultural advice, including optimal crop selection, planting times, and ideal growth conditions based on soil and weather parameters.
- Leveraged soil and weather parameters to generate context-aware recommendations, demonstrating applied AI and backend integration skills.

Dual-Function Smartwatch with Power Bank

- Engineered a concept for a smartwatch with integrated power bank capabilities, aimed at providing critical mobile charging during emergency situations.
- Created detailed prototypes and technical documentation covering hardware architecture and use-case scenarios.

Education

MVJ College of Engineering

B.E in CSE - Information Science and Engineering (2023–2027)

- CGPA – 8.42 / 10

Achievements

- VertchX hackathon – 9th November 2025, MVJCE - Winner
- Vyuhatech 2.0 – 8th October 2025, CMRIT - Winner
