SUMMARY

Final-year engineering student (CGPA 8.36) who likes turning everyday frustrations into AI tools people actually use, whether that's a cluttered inbox, a stuck student, or a brand unsure which creator to trust. An internship building data pipelines at Startup Haven and two hackathon wins taught me to ship fast, work well with a team, and keep improving after launch.

EXPERIENCE

Startup Haven Jan 2025 – Jun 2025

Software Engineer Intern

- Built a price-comparison platform to evaluate prices, offers, and delivery times across quick-commerce and e-commerce apps.
- Engineered scalable web-scraping pipelines that normalize multi-source product data into one schema for reliable comparisons.
- Designed responsive comparison interfaces that turn standardized multi-source data into clear, decision-ready results.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
AI / LLM: LLM Applications, RAG, Multi-Agent Systems (Mastra), Embeddings, Qdrant
Frontend: React, Next.js, Vite, HTML, CSS
Backend: Node.js, Express.js, FastAPI, REST APIs, OAuth 2.0
Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase
DevOps & Tools: Git, GitHub, Docker, Vercel, Render

PROJECTS

MailMind AI *React, TypeScript, FastAPI, PostgreSQL, Redis, Docker* GitHub | Demo

- Built a full-stack Gmail AI assistant with Google OAuth inbox sync, LLM-powered summarization, reply drafting, smart cleanup, natural-language search, and a conversational inbox chat.
- Implemented secure refresh-cookie sessions and Redis-backed sync state; deployed the SPA on Vercel with the production API on Render/Supabase and Docker Compose for local Postgres/Redis.

Synaptiq *Mastra, Qdrant, Groq, React, Vite, TypeScript* GitHub | Demo

- Built a multi-agent AI tutor with board-aware RAG (CBSE/ICSE, Classes 6–12) and a retrieve → tutor → Enkrypt safety pipeline on Groq LLMs for syllabus-grounded doubt solving.
- Delivered a study UI with streaming answers, exam-style practice, Quick Challenge mastery tracking, and a STEM solver that explains math and science problems step by step.

RankMint *Team project • Next.js, React, TypeScript, Python, Supabase, pgvector* GitHub | Demo

- Co-built a creator intelligence platform that ranks YouTube and X creators from live API data on authenticity, growth, brand fit, and a composite score for campaign-ready vetting.
- Implemented multi-layer ML scoring (authenticity heuristics, growth modeling, embedding brand match, logistic regression) with compare, leaderboard, PDF export, and pgvector caching.

EDUCATION

MVJ College of Engineering, Bengaluru 2023 – 2027
B.E. in Information Science and Engineering CGPA: 8.36 / 10

New Horizon Pre-University College 2023
Class XII (Pre-University) Percentage: 82.6%

New Baldwin International Residential School 2021
Class X Percentage: 84%

ACHIEVEMENTS

- **Winner**, VertchX Hackathon, MVJCE — Nov 2025
- **Winner**, Vyuhatech 2.0, CMRIT — Oct 2025
- **Top 20%**, HackerRank Orchestrate: ranked 287 of 1,773 participants — Jun 2026
- **Top 15**, OFF/BEAT × CF D2C Challenge, for KaariGharKala, a D2C artisan brand concept — Jul 2025
